

UNIVERSITY OF ZENICA

**Project:
INTRODUCTION OF THE ECTS AT THE B&H UNIVERSITIES
(Tempus Joint European Project)**

COURSE STRUCTURE AT THE THREE FACULTIES:

**FACULTY OF MECHANICAL ENGINEERING
FACULTY FOR METALLURGY AND MATERIALS SCIENCE
PEDAGOGICAL FACULTY**

Zenica, January, 2005.

COURSE STRUCTURE

**IN AGREEMENT WITH
ECTS (EUROPEAN CREDIT TRANSFER SYSTEM)**

Mechanical Engineering – a short name for a course which must pass on a very broad field of technical knowledge. The range of technology leads to perceptions of study and profession which vary greatly and are often inaccurate. The objective of the study is to acquire knowledge and abilities to work on mechanical engineering tasks in research, development, manufacturing, environmental protection or organisation. The study is oriented towards the demands of engineering practice, under conditions resulting from technical, economic and social developments. Characteristic for these developments are new fields of mechanical engineering activity and increasing demands on engineering expertise.

To gain the amount of knowledge which will secure a competitive position in the profession during the given period of study, it is necessary to concentrate on certain scientific subjects. Therefore the study is divided into preliminary studies, which provide fundamental scientific knowledge and a major studies in a field of study or a specialisation in the field of study.

Zenica, February, 2004.

BASIC INFORMATION ABOUT STUDIES

1. The study of mechanical engineering is divided into two blocks : The Preliminary Studies Examination (Blok A and Blok B) and the Major Studies Examination. They are collections of the required examinations, projects and practical work.
2. The required coursework for the Preliminary Studies Examination consist of 60 semester week hours: fifty percent of lectures and fifty percent of exercises.
3. The required coursework for the Major studies consist of 60 semester week hours: fifty percent of lectures and fifty percent of exercises and for the students are obtain different number of elected classes. Finally diploma thesis requires three to six months of work.
4. The official duration of studies including the Major Studies Examination is eight semestres (this plan & in previous solutions 9 semester). This does not include time spent in practical training and Diploma thesis work.
5. Studies begin in the winter semester. Winter semester lectures run from October until February. They are followed by an examination period which ends at the end of February. Summer semester lectures begin in March and the summer examination period stretches from July until the end of September/October.
6. The courses of Mechanical Engineering consist of lectures, exercises and laboratories. The types of courses can be characterized as follows:
 - a. *Lectures (L)*: During the lectures the material is presented orally using stencils, diagrams and didactic material. The lectures give an outline of the material together with general knowledge and they show essential connestions. A lecture normally lasts less than one and a half hours.
 - b. *Exercises (E)*: The eercises complete, deepen and reinforce the material from the lectures by applying it to problems related to the lecture.
 - c. *Laboratories (l)*: The laboratories provide the opportunity to learn and practice research processes and experimental methods and skills and to evaluate results. The individual experiments are performed at several institutes with both simple and complex divices.
 - d. *Seminars (S)* : The exercises follow projects, programs, studies (ideas, fizibility etc.) which students works autonomus or with help of assistants.
 - e. *Excursions(e)-Industrial practice*: During excursions of one or more days, information and descriptions of recent developments in technology are presented, using examples outside of the University. The requirement of participation on at least one excursion before beginning the diploma thesis is not applicable, if the Department of Mechanical Enginnering does not have enough funds to finance this.
 - f. *Consultations (C)*: During the semester students are obliged for permanent work through consultations with professors and assistants.
 - g. *Working hours for writing exams (WE)*: The hours recognised for students autonomous work for writing exams preparation.
 - h. *Working hours for oral exams (OE)*: The hours recognised for students autonomous work for oral exams preparation.
7. A lecture or an exercise hour is forty-five minutes long.

The PRELIMINARY STUDIES – FOR ALL STUDENTS (BLOK A + BLOK B)

BLOK A (consists of 16 examinations)

First academic year (The semester working hours)

No	Course title	I and II SEMESTER					
		Winter			Summer		
		L	E/I	S/e	L	E/L	S/E
1	Mathematics I	45	45		45	45	
2	Statics	30	30				
3	Material Sciencies	30	30		30	30	
4	Mechanical Drawing				45	60	
5	Kinematics				30	30	
6	Informatics	15	30		30	30	
7	Physics	30	30				
8	Chemistry	30	30				
Total:		375			375		

ECTS (European Credit Transfer System)

		Winter			Summer		
		L	E/I	S/e	L	E/I	S/e
Sub-specialisation: Maintenance in maining:					45	45	
8	Maining Technologies				45	45	
9	Maining Machines 1				45	45	
10	Maining machines 2				45	45	
Sub-specialisation: Maintenance in metalurgy:							
8	Assemby and Disassembly				45	45	
9	New Production Technologies				45	45	
10	Non-materials Production Technologies				45	45	
Sub-specialisation: Maintenance in energetics:							
8	Energetics Machines and Equipment 1				45	45	
9	Energetics Machines and Equipment 2				45	45	
10	Process Technologies and Machines				45	45	
Sub-specialisation: Maintenance of Motor-vehicles and Civil-engineering machines:					45	45	
8	Motor vehicles				45	45	
9	Civil-engineering Machines				45	45	
10	Transport Systems				45	45	

SUMMARY

The PRELIMINARY STUDIES – FOR ALL STUDENTS (BLOK A + BLOK B)

BLOK A (consists of 16 examinations) + BLOK B (consists of 3 obligatory examinations)

The PRELIMINARY STUDIES – FOR ALL STUDENTS (BLOK A + BLOK B)

BLOK A (consists of 16 examinations)

First academic year (The semestar working hours)

Number of working hours	I and II SEMESTER	
Total:	375	375

ECTS (European Credit Transfer System)

	ECTS Points	
Total:		60,0

Second academic year (The semestar working hours)

Number of working hours	III and IV SEMESTER	
Total:	390	375

ECTS (European Credit Transfer System)

	ECTS Points	
Total:		60,5

BLOK B (consists of 3 obligatory examinations)

I and II academic years (number of working hours)

	Number of working hours	I and II YEAR	
Total:		210	210

ECTS (European Credit Transfer System)

No		ECTS	
Total:			20,5

**MAJOR STUDIES
(STUDENTS DIVIDED IN THE FIELD OF STUDY)**

1. Field of study: ENGINEERING DESING

Third academic year (The semestar working hours)

No	Number of working hours	V and VI SEMESTER	
Total:		375	375

ECTS (European Credit Transfer System)

No		ECTS	
Total:			69,5

Fourth academic year (The semestar working hours)

	Number of working hours	VII and VIII SEMESTER	
Total:		375	390

ECTS (European Credit Transfer System)

		ECTS	
Total:			66

Summary:

Total ECTS =
=Blok A (60 + 60,5 ECTS) +
+Blok B (20,5 ECTS) +
+Major Studies (69,5 + 66 ECTS) = 276, 5 ECTS

2. Field of study: PRODUCTION TECHNOLOGIES MANAGEMENT

Third academic year (The semester working hours)

	Number of working hours	V and VI SEMESTER	
		375	375
	Total:		

ECTS (European Credit Transfer System)

		ECTS	
			69,5
	TOTAL:		

Fourth academic year (The semester working hours)

	Number of working hours	VII and VIII SEMESTER	
		420	390
	TOTAL:		

ECTS (European Credit Transfer System)

No		ECTS	
			69
	Total:		

Summary:

Total ECTS =

=Blok A (60 + 60,5 ECTS) +

+Blok B (20,5 ECTS) +

+Major Studies (69,5 + 69 ECTS) = 279, 5 ECTS

3. Field of study: ENVIRONMENTAL ENGINEERING

Third academic year (The semester working hours)

		V and VI SEMESTER	
TOTAL:		390	375

ECTS (European Credit Transfer System)

		ECTS	
TOTAL:			70

Fourth academic year (The semester working hours)

		VII and VIII SEMESTER	
TOTAL:		375	375

ECTS (European Credit Transfer System)

		ECTS	
Total:			63

Summary:

Total ECTS =
=Blok A (60 + 60,5 ECTS) +
+Blok B (20,5 ECTS) +
+Major Studies (70 + 63 ECTS) = 274 ECTS

4. Field of study: MAINTENANCE

Third academic year (The semester working hours)

		V and VI SEMESTER	
TOTAL:		375	390

ECTS (European Credit Transfer System)

		ECTS	
TOTAL:			63,5

Fourth academic year (The semester working hours)

		VII and VIII SEMESTER	
TOTAL:		375	375

ECTS (European Credit Transfer System)

		ECTS	
Total:			70

Summary:

Total ECTS =
=Blok A (60 + 60,5 ECTS) +
+Blok B (20,5 ECTS) +
+Major Studies (63,5 + 70 ECTS) = 273,5 ECTS
